

**MULTICULTURAL
AUSTRALIA**
it's who we are

Care Finder

Culturally informed connections to Aged Care and services.

Care Finder delivers a face-to-face network of assistance to older vulnerable adults that helps to navigate through, and access aged care.

We help individuals understand and access elder care and connects them to related community assistance.

Through Care Finder, our team makes your care journey easier by connecting you with providers to get the right care you need.

Why Care Finder?

Some older Australians require more assistance to navigate the aged care system, particularly those from culturally and linguistically diverse backgrounds.

They may face:

- language and communication barriers
- information processing challenges brought on by cognitive decline
- unwillingness to engage with a need for support or government services.

Who can access Care Finder?

Multicultural Australia's delivery of Care Finder is to those:

- over 65 years old
- living in Brisbane South
- from culturally and linguistically diverse backgrounds
- with limited support to access and navigate aged care services via MyAgedCare.
